SCARE PLACES NEW FOCUS ON MAILROOMS SOME CONSIDER CENTRALIZED OFF-SITE MAIL-SCREENING

San Jose Mercury News (SJ) - Friday, October 19, 2001
By: ADAM GELLER, Associated Press
Edition: Morning Final Section: Business Page: 3C
Word Count: 466

... A handful of companies that contract with Pitney Bowes have asked to have their mail **quarantined** in a secure area cut off from air circulation systems, said Critelli, who declined to provide further details.

Less than 5 percent of Pitney's client companies now process **mail** using the highest security measures available, including devices like **bomb detectors**, Critelli said. That is largely because of the cost, he said.

Untangling the Web: A review of certain secure e-commerce legal issues
Bond, Robert; Whiteley, Caroline
International Review of Law, Computers & Technology v12n2 PP: 349-370
Jul 1998
ISSN: 1360-0869 JRNLCODE: IRLC
WORD COUNT: 10700

...TEXT: data processing requirements now.

Ensure that the registration details meet your proposed data processing requirements.

Notify the Data Protection Registrar of any changes that need to be made to the terms...will be immediately read. It has been suggested that the point when delivery of a **message** is deemed to take place is at the point of sending and not necessarily receiving...

...real time, it has been suggested that delivery is instantaneous. Therefore the transmission of a **message** is deemed to be delivered when it is received. This distinction is important when considering...published. This could result in liability being extended far beyond this country, even if the **message** is first sent from here, if it can be accessed elsewhere. Equally, ill-informed comment...

...statutory maximum limit and can include an award for injury to feelings.

Apart from abusive **messages** directed to the individual in question, e-mails between other employees may be relevant in...

...findings:

more than 50% of employees questioned had received abusive, aggressive or deliberately anti-social **messages** -so-called 'flame mails';

31% had responded with a similarly abusive reply;

one in 70...to find that a collateral contract came into existence through the exchange of e-mail **messages** .

Advice. Employers can be liable for advice given by e-mail (even if unauthorized) just...

...sending a postcard-everyone can read it. A third party can fairly readily intercept a **message** sent on the Internet without advanced technology and with little chance of being **detected** .

Staff should be warned of the potential **dangers** . E- mail appears deceptively confidential and employees may simply not be aware of the security risks presented when an email is sent over the Internet, as opposed to **messages** within a self-contained network in the office.

Various technical solutions are available to assist...

...only routine e-mails to be sent on an open line. Encryption will protect

a **message** from a third party attempting to intercept and read or modify it or substitute a forged **message** .

It has become common to include confidentiality notices on faxes along the following lines:

This...

...are confidential and may be privileged. If you have received this fax in error, please **notify** us immediately. You should not use it or copy it for any purpose, nor disclose...be given to whether hard copies need to be made for record-keeping purposes of **messages** sent or received.

The knowledge that **messages** will be retained and maybe disclosable could well have the advantage of encouraging staff to think carefully about the contents of their **messages** .

Confirmation of Receipt. Where it is important to know that a **message** has been received (for example concluding an agreement) e-mail's confirmed receipt facility must...

...of time using it for private purposes.

Employees may be under the impression that their **messages** are confidential, but they are not and an employer in this country currently breaks no...for convenience, as usually happens with telephone calls?

will the e-mailing of some sensitive **messages** be prohibited, for example employment decisions?

will the e-mail of certain employees be subject...
...company property and that the employer reserves the right to monitor and to access any **messages** in the system;

warn employees of the risks of personal and company liability for improper use;

state that the system should never be used to send **messages** which are abusive, sexist, racist or defamatory;

warn that e-mail **messages** may be read by others and that, accordingly, confidential information should never be sent by...

...any event, only be sent to authorized persons;

warn that the mere deletion of a **message** or file may not fully eliminate it from the system;

point out that e-mails...

...or damaging, may have to be disclosed to third parties;

warn that unknown files or **messages** should never be introduced into the system without first being checked for viruses;

warn employees...

...Act details?);

encourage staff not to waste time and congest the system by sending trivial

messages and carrying out unnecessary copying.

It is essential that, apart from listing the rules, employees...

...electronic commerce system requires the implementation of cryptography-the art or science of keeping a **message** secure. Cryptography can be used to:

hide information content

establish authenticity

prevent undetected modification

prevent...

...communication networks and technologies as well as the development of electronic commerce.

Using encryption technology, **senders** and **receivers** of electronic **messages** each possess two keys, one of which is never shared with anybody and the other...

...with one key can only be decoded by the other. During the encrypting process the **sender** of the **message** encodes the **message** with the recipient's public key, making it impossible for any party other than the one holding the private key to decrypt the **message**. Encryption, therefore, protects the **message** from all parties other than the recipient without the recipient having to divulge his private key to the **sender**.

If the process above is reversed then public key cryptography also provides a highly dependable...

...running an electronic communication through a one way hash function and then encrypting the resulting **message** digest with the **senders** private key.

If public key cryptography is to succeed as a method for secure electronic ...will provide notarial services digitally and will ensure the security validity and evidential value of **messages** transmitted digitally.

In the US they are intended to be attorneys who are legally and technically able to ensure the security the security, validity and evidential value of **messages** and may also be entitled to perform other international notarial services.

Why do we need...

...of trust and security.

In electronic commerce the use of asymmetric encryption can provide both **message** security and identity of signature and the use of digital certificates provides further authenticity of...

...neutral trusted intermediary function within international trade transactions, acting as a central hub through which **messages** can be transmitted and contractual relationships created. The CyberNotary may act for all parties within...

...satisfies the notary as to his or her identity; or providing an 'ensuring' service of **messages**, as ...the ICC's Electronic Commerce

Project; data and time stamping to provide evidential value for **messages** and contracts created digitally; and a cyberarchiving service for the recordal of web trade contracts...

...advise companies on the best legal methods for ensuring the validity and evidential value of **messages** and contacts created digitally.

Notwithstanding the position of the European notaries a number of governments...

...much draft legislation is that on the one hand governments require legitimate access to encrypted **messages** and therefore require private keys to be placed in escrow to be released upon the...1997 in order to provide a general framework for digital authentication and certification of digital **messages** based upon existing authentication and certification law and practice in different legal systems. In so...

...Commerce Project has developed an electronic repository for the voluntary deposit of standard terms and **messages** and contracts used within electronic commerce and it is anticipated that in due course the...
